DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: in the specification, page 1, the patent no. "4,799,376" appears to be incorrect; in the specification on page 11 and 12 the numerals that refer to the parts in the Figures are either not shown therein or are represented by different numerals in the Figures; and on page 22 of the specification reference is made to Figures 6 and 9, but there is no Figure 6 or 9 present in the drawings.

Appropriate correction is required.

Claim Objections

2. Claim 3 is objected to because of the following informalities: There is no antecedent basis for the term "the compatible component" in claim 3. Support for this term should be provided in claim 1 or 2. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of the claims is not clear because they refer to the Figures and not specific structural features.

Double Patenting

4. Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 10/817484. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

5. Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 10/817628. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1772

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 00/64670. See Figure 4.

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Walters et al 4,960,631. See Figure 1 and column 2, lines 33-37.

Allowable Subject Matter

10. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
